AVAILABLE WORKS**

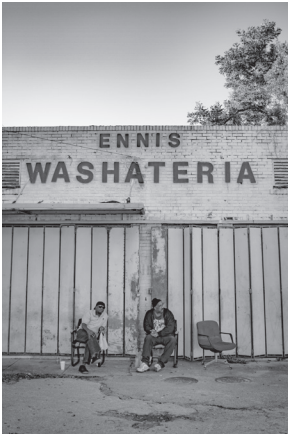

MARCH 22 - MAY 18, 2024

PRESENCE

ART IS BOND. is pleased to announce the opening of our newest group exhibition **PRESENCE**. “Presence” captures the essence of our surroundings through a compelling array of photo-based art, delving into the intricate relationship between geography and the lingering imprint of human presence. These works beautifully unveil the nuanced remnants that resonate within these spaces, capturing the energetic residue left behind by our interactions with the environment. Through evocative visuals, this exhibition invites contemplation on the fusion between geographical landscapes and the profound imprints of human existence. Each photograph immerses viewers in a journey that transcends mere imagery, revealing the unseen connections between places and the individuals who traverse them. Key spaces, whether commercial hubs or transient environments, are illuminated as integral elements of our cultural tapestry. They cease to merely serve functional roles but emerge as living components of people’s lives, fostering a symbiotic relationship where spaces absorb the essence of those who inhabit or pass through them. “Presence” extends beyond showcasing geographical landscapes; it encapsulates the emotional, cultural, and historical imprints etched into these spaces. The exhibition serves as a visual narrative, inviting reflection upon the interconnectedness between humanity and the environments we inhabit, creating a mosaic of memories, emotions, and cultural identities within these key spaces.
